Rohinsha G

Full Stack Developer | Python, JavaScript, React & Agentic AI

Location: Hitech City, Hyderabad | Phone: +91-7841042654 | Email: r2hinsha@gmail.com
Portfolio: rohinsha.netlify.app | GitHub: github.com/rohinsha | LinkedIn: rohinshaLinkedin

PROFESSIONAL SUMMARY

Detail-driven Full Stack Developer (IIIT Pune) with **8.5+ years** of experience architecting sleek, reliable web applications from database to pixel. Specialized in designing scalable REST microservices, structuring relational and cloud databases, and pairing them with intuitive, responsive user interfaces backed by clean architecture and production-ready code. Currently expanding into Agentic AI, channeling end-to-end engineering expertise into building next-generation autonomous and AI-powered solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Flexbox, Sass, JavaScript (ES6+), TypeScript, ReactJS, Angular, Redux, Redux Thunk, Context API, TanStack Query, Zustand, Bootstrap, Material UI, PixiJS

Backend & APIs: Python, FastAPI, Node.js, Express.js, SQLAlchemy, REST APIs, Microservices, OpenAPI / Swagger, OAuth 2.0, JWT

Databases: Snowflake, Azure SQL, PostgreSQL, MySQL, MongoDB

AI & Emerging Tech: Agentic AI, LLMs, RAG, OpenAI API, Anthropic Claude, LangChain, LangGraph, MCP

Cloud & DevOps: Microsoft Azure (App Services, Azure Functions, Event Hubs, Key Vault), AWS EC2, Docker, Kubernetes, Nginx, Azure DevOps, GitHub Actions, Jenkins, GitLab CI/CD, Git

Testing & Quality: Jest, React Testing Library, Pytest, Pylint

AI Developer Tools: Cursor, GitHub Copilot

WORK EXPERIENCE

Stewart Title – Senior Software Engineer **May 2023 – October 2026**

A leading global title insurance and real estate technology provider delivering digital mortgage platforms, underwriting solutions, and settlement services worldwide.

- Built and maintained scalable REST microservices (Property, Policy, and Common Services) using Python and FastAPI to handle title policy, property search, and document data.
- Developed responsive user interfaces and reusable components for the SPECTR web portal using ReactJS, TypeScript, and Redux.
- Connected backend APIs with Snowflake and Azure SQL databases, and integrated third-party services like Smarty Streets for address standardization.
- Secured API endpoints using OAuth 2.0 (JWT) and deployed containerized services on Microsoft Azure via CI/CD pipelines.
- Mentored interns across full-stack architecture, prompt engineering, and AI-driven coding standards, driving code quality through task delegation and structured code reviews.

Ivy Comptech Private Limited, Hyderabad – Senior Software Engineer **February 2020 – May 2023**

One of the largest technology providers for Entain, creating innovative software and agile platforms powering the global online gaming industry.

- Worked as a technical mentor, delegating and reviewing tasks involved in cross-platform slot game development.
- Built highly compatible, responsive client-specific games across devices using HTML5, Bootstrap, PixiJS, Angular, ReactJS, Redux, Redux Thunk, and SCSS.
- Engineered reusable, dynamic UI components in declarative JavaScript.

Gamenous Pvt. Ltd, Hyderabad – Lead Frontend Developer **November 2018 – December 2019**

Specializes in building rich user interfaces, responsive web applications, and scalable infrastructure solutions for clients such as Cube Highways.

- Collaborated in an 8-developer Agile team to build responsive UI features for a Toll Management System (TMS) using ReactJS and Redux.
- Integrated hardware peripherals—including Lane Cameras, Barcode Readers, Printers, Unit Fare Displays (UFD), Overhead Lane Signals (OHLS), and Automatic Vehicle Classification Counters (AVCC)—with Node.js.
- Mentored junior Angular developers in DRY coding patterns and best practices to optimize performance and scalability.
- Built CI/CD pipelines using Jenkins and GitLab.

ITS Planners and Engineers Pvt. Ltd, Hyderabad – Frontend Developer **November 2017 – August 2018**

Technology partner of Equiphunt, operating a B2B marketplace for construction equipment sales, rentals, and highway traffic management.

- Redesigned and developed control-room interfaces for the Highway Traffic Management System (HTMS), integrating VMS boards, MET sensors, ATCC sensors, CCTV cameras, and Emergency Call Boxes.
- Developed frontend modules in Angular and managed back-office modules for suppliers and renters on equipment.com.

KEY PROJECTS

Patient Connect — Dental Health Platform **Python • Docker • AWS EC2 • Mirth Connect**

- Architected and built Patient Connect, an end-to-end platform streamlining patient intake and insurance eligibility, shipping core modules and third-party integrations 20% ahead of schedule.
- Engineered a Python-based RPA automation engine to verify insurance eligibility across 15+ payer portals, slashing manual verification time by 90%+ and eliminating manual entry errors.
- Containerized RPA workers with Docker on AWS EC2, enabling horizontal scaling to seamlessly absorb a 5x surge in client volume.
- Built automated Mirth Connect pipelines to synchronize 10,000+ daily patient records, appointments, and insurance policies from OpenDental PMS.
- Spearheading an AI-powered IVR voice agent for real-time payer eligibility checks, projected to cut verification overhead by 40%.

CareerXel — AI-Powered Job & Career Portal **React.js • Node.js • MySQL • Docker • Nginx**

- Built a full-stack job portal from scratch, driving sprint planning, system architecture, and code reviews to uphold clean coding standards.
- Designed the core full-stack architecture using React.js, Node.js, and MySQL, owning database schema design and high-availability backend services.
- Built and integrated two flagship AI features into a responsive frontend:
  - **AI Mock Interview Simulator:** Real-time conversational interview engine with adaptive follow-up questions and structured performance feedback.
  - **AI Career Advisor:** Personalized recommendation engine analyzing resume data and career goals to suggest tailored roles, skill gaps, and learning paths.
- Owned the complete SDLC from requirements and API design to containerized production deployment on AWS EC2 behind an Nginx reverse proxy.

EDUCATION

Examination	Board / University	School / College	Percentage	Year
10th	SSC (Maharashtra)	J.N Tata Parsi Girl's High School, Nagpur	83%	2009
12th	HSC (Maharashtra)	Sindhu Mahavidyalaya, Nagpur	73%	2011
B.E (Computer Science)	Pune University	International Institute of Information Technology, Pune	61.4%	2015
