Contact: +91-7841042654
Address: Hitech City, Hyderabad
Email: r2hinsha@gmail.com
Date of Birth: 6th April, 1994
Website: https://rohinsha.netlify.app/

I'm Rohinsha, a tech-savvy, graduated as a Computer Engineer from IIIT, Pune and now a pedantic Front-end developer with 4.5 yrs. of experience I am passionate about writing readable code that follows best practices. Innovate, design and code in an extraordinary manner are some key aspects I am good at. Tailoring great user experience by tweaking the art of design with the art of programming. Bringing a designer's concept to life with front-end web technologies and organizing the structure of websites to make them appealing for the users are some of the major tasks.

EXPERIENCE

---

1. Ivy Comptech Private Limited, Hyderabad – *Senior Software Engineer*.

   February, 2020 – Till Date.

   This organization aims to shape the future of game experiences with all the cutting-edge technologies. Ivy is one of the largest technology providers for Entain, one of the world's biggest gaming groups. They create innovative software and agile platforms that power the global online gaming industry.

   - Working as a Mentor, where I am responsible to delegate and assign tasks involved in slot game development.
   - Client specific games which are highly compatible and responsive in all devices are build with HTML5, BOOTSTRAP, PIXIJS, ANGULAR 2+, REACTJS, SCSS.
   - Primarily developed reusable dynamic components in declarative JavaScript.

2. Gamenous Pvt. Ltd, Hyderabad – *Lead Frontend Developer*.

   November, 2018 – December, 2019.

   Company specializes in building client applications with rich user interface and responsive web design. Provide highly optimized, scalable and efficient infrastructure solutions as per business needs. One of it's client is CUBE HIGHWAYS, which is independent, professionally-managed company managing and operating a world class portfolio of toll roads in India.

   - Toll Management System (TMS) is an application equipped to fulfill all the enhanced features necessary in collecting toll taxes on roads. It is deployed in one of the Highways in Hyderabad, Telangana.
   - Work as part of a 8 developers team in an agile environment to develop responsive UI features with Angular 7.

- Various hardware's like Lane Cameras, Barcode Reader, Printer, Unit Fare Display (UFD), Ovesr Head Lane Signal (OHLS), Automatic Vehicle Classification Counter (AVCC) are integrated with NodeJS as per project requirements.

- Mentor junior angular developers in following best practices throughout application building, implemented DRY coding patterns for high performance and to achieve scalability.

- Use Jenkins and Gitlab to built scripts for continuous integration and continuous deployment (CI/CD).

3. ITS Planners and Engineers Pvt. Ltd, Hyderabad - *Frontend Developer*

November, 2017 – August, 2018

It is one of the portals for B2B marketplace which deals with rental and sale of construction equipments, spare parts and other services related to equipments. ITSPE is the technology partner of Equiphunt.

- Highway Traffic Management System (HTMS): ITSPE traffic management product, the Traffic Intelligence Server, can be used to manage the Highway Traffic from the control room. HTMS is capable to integrate Variable Message Sign (VMS) boards, Meteorological (MET) sensors, Automatic Traffics Counter & Classifier (ATCC) sensors, CCTV cameras and, Emergency Call Box of any brand and specifications. I had developed and modified all the screens of HTMS for better look and feel.

- Handling the backoffice modules of equipment.com website, data will be maintained by Equiphunt operational team.

- Developed UI and frontend working modules for internal systems which help to cater the needs of suppliers and rentors of equipments.
